

```
# Check if manually mapped
cat /etc/hosts

# Try DNS resolution
dig +short <hostname>
nslookup <hostname>

# Simple ping
ping -c 1 <hostname>

# Windows-style NetBIOS name lookup
nmblookup <hostname>

# DNS brute-force (if DNS known)
dnsrecon -d <domain> -n <DNS_SERVER_IP>

# Bash loop brute-force
for h in $(cat names.txt); do ping -c 1 $h.domain.local | grep "PING"; done
```
